Chapter 1 <Introduction>

1.1 <Product Overview>

LP-179 is a Pico-ITX Motherboard which supports 11th Generation Intel® Core™ U-Series processors, integrated Intel® UHD Graphics, DDR4 memory, Realtek High Definition Audio, Intel Gigabit LAN, USB3.2 Gen2, SATA3 with AHCI function for a system.

New feature for Tiger Lake

Tiger Lake UP3 processors are based on the 10nm process node, and offer long-life availability. They have a PCIe Gen4 for M.2 2280 slot.

All in One multimedia solution

The board provides high performance onboard graphics, and supports DisplayPort, HDMI, and High Definition Audio, to meet the very requirement of the multimedia application.

Tiger Lake support Windows10 version 2004 64bit and Linux kernel 5.8

Intel recommends using Windows 10 version 2004 64bit. It may lose some drivers if you use other Windows version.

Support OpenVINO for AI Computing

[FPT Tool](#)

The tool's file name is "FPT.efi", it's the utility that can write the data into the BIOS flash chip and update the BIOS.

A.2 <Flash BIOS process>

- 1.Extract the zip file(re-flash tool and BIOS file) to root of the USB flash drive.
- 2.Insert your USB flash drive in USB port of the board and power on the system.
- 3.Press F5 in the Phoenix Logo screen
- 4.Click the Internal Shell, then input the "fs0:" command to switch to the root of the USB flash drive.
5. Type the " fpt -savemac -f xxx.bin" command to start flash BIOS processes.
(xxx.bin means the BIOS file that you want to update)
6. When it finished all update processes, restart the system.
